## MAKING MEMORIES, WITH LEGENDARY SOUND FROM AR.

A good subwoofer, that is good deep bass, is literally the foundation of every room's "sound stage". No matter what you play... music, movies, games -- a sub is the most critical speaker in any audio system.

Recognizing this, AR's designers ensured RX subs deliver world-class bass that will fit any enthusiast's budget. Adapting technology from our highly-regarded "X Series" family, we tailored these new subs to the more intimate spaces most of us call home. Specially built amps, 10" and 12" drivers, and our famed slot ports provide unusually powerful, detailed depth. This is sound that will move you.

### THE DRIVER

#### ／ AIR-DRIED PAPER CONE

- > Long stroke, linear power demands balanced frequency response and low distortion, for which AR's air-dried paper cones still excel.
- > Precision, heavy-duty stamped black steel basket allows for maximum cooling, maximum durability and strength.
- > Oversized motor and large voice coil enhances efficiency and dynamic power handling.
- > Tough CONEX spider selected for high-output yet nuanced control and coupling with RX subs' slot port tuning.

## THE CABINET

### GENEROUSLY SIZED FOR GOOD REASON

- > Naturally efficient, articulate bass requires generously sized cabinets, like these.
- > RX cabinets' costly rear slot port greatly reinforces deep bass response.
- > Recessed woofer and amp, plus removable grill are high-end touches you expect from AR.

## THE CONTROLS

### EVERYTHING YOU NEED, NOTHING YOU DON'T.

- > Classic controls. Elegant, easy to access aluminum rotary knobs.
- > Continuously variable 40-200Hz stereo crossover allows simple integration with music enthusiasts' two-channel systems.
- > Quick-adjust bass: 0 ~ 180 chrome Phase toggle, co-located with Gain and Crossover controls.

## THE AMP

### AFFORDABLE IS STILL POWERFUL AT AR

- > Top RX-2512 uses a robust Class-D 250 watt amp, with 600 watts peak power for exceptionally dynamic low distortion sound.
  - > High power stereo speaker-level and low-level RCA inputs allow easy integration with any sound system -- from basic stereos to full 7.2 channel, dual-sub surround sound systems.
  - > Power LED, Dual-Voltage slider, Auto-On/Always-On toggle, plus Mains Power On/Off rocker switch.
  - > Detachable, grounded power cord with heavy-duty IEC input/socket.
