UltraHD Switch 3:1

4k2k High Speed HDMI Selector

The Oehlbach UltraHD Switch 3:1 puts an end to the frequent replugging necessary for too many source devices. The device receives signals up to UltraHD resolution of 2160p with three HDMI inputs and transmits the data flow of the desired input to a connected target device without any loss of quality in each case. In addition to the UltraHD video signal, it goes without saying that all audio formats are also supported, up to and including Dolby TrueHD and DTS-HD MA as well as DSD. The three HDMI inputs as well as the HDMI output are 24 carat gold-plated and therefore guarantee the highest possible transmission reliability. The solid metal enclosure is compact with dimensions of 63.5 x 23 x 59 mm (wxhxd) and weighs just 82 g. A remote control is provided for convenient changing between the individual inputs.

Features

- ✓ 24- carat gold-plated contacts
- ✓ Solid metal housing
- ✓ loss-free signal transmission
- ✓ including remote control
- ✓ 4k2k support (2160p)
