

QUALITY ★★☆☆☆

Phono PreAmp Pro

Low-distortion phono amplifier for record players with MM or MC pickup

The Phono PreAmp Pro from Oehlbach integrates your record player with an MM or MC cartridge into existing high-quality hi-fi components without a dedicated phono input. The low-noise pre-amp is fitted with gold-plated contacts to guarantee a stable and reliable connection between the phono device and the hi-fi system. Equipped with an external power supply, the Phono PreAmp Pro weights just 100 g and easily fits into any hi-fi rack thanks to its compact design. The individual components are connected via analogue stereo RCA connectors.

Available from february

Features

- ✓ 24- carat gold-plated contacts
- ✓ For moving-magnet pick-up
- ✓ For moving-coil pick-up
- ✓ Power supply via external power supply unit

Technical Data

| | |
|--------------------------------|-------------------------------|
| Operating current | < 100 mA |
| Output voltage | (MM) / (MC) 600 mV |
| Input sensitivity | (MM) 5mV / (MC) 0,5mV |
| Weight | 0,1 kg |
| Balance des canaux | (MM) < 0,5 dB / (MC) < 0,5 dB |
| Channel Separation | > 70 dB (MM), > 60 dB (MC) |
| Voltage supply | 18V/DC, 150 mA |
| Distortion | (MM) < 0,1 % / (MC) < 0,1 % |
| Permissible relative humidity: | 5% to 90% |
| Temperature range: | -15°C to +50°C |
| Signal-to-noise ratio | >72 dB (MM); >60 dB (MC) |
| Input impedance | (MM) 50 Ohms (MC) 100 Ohms |
