# A STORY OF PASSION

25 years ago a young student of engineering - with a vibrant passion for music - felt disappointed with how LP's sounded on his system, and decided to design his very own first turntable. At the time, everyone thought he was just a dreamer.

The student was Maurizio Aterini and that turntable was the beginning of a long and exciting research path. A path focused on finding the perfect synergy between components, and on crafting a complete chain of audio equipment able of delivering a rich, signature sound.

After more than 10 years spent developing designs for other top brands as an OEM company, Maurizio founded Gold Note in 2012. And today, he is the CEO of an enterprise present in more than 50 countries, leading his team with the same enthusiasm, determination and passion that has brought him here.

# TRADITIONAL AND CONTEMPORARY HAPPILY COEXIST

Every time we design, engineer and craft our products, we skillfully combine tradition and innovation. This seemingly contradictory concept has its roots in our very own cultural identity, in our Italian heritage. Craftsmanship, creativity, know-how, and the sense of beauty have always happily coexisted. The products we create truly reflect all of this, what we are and what we love. This is simply our way of life.

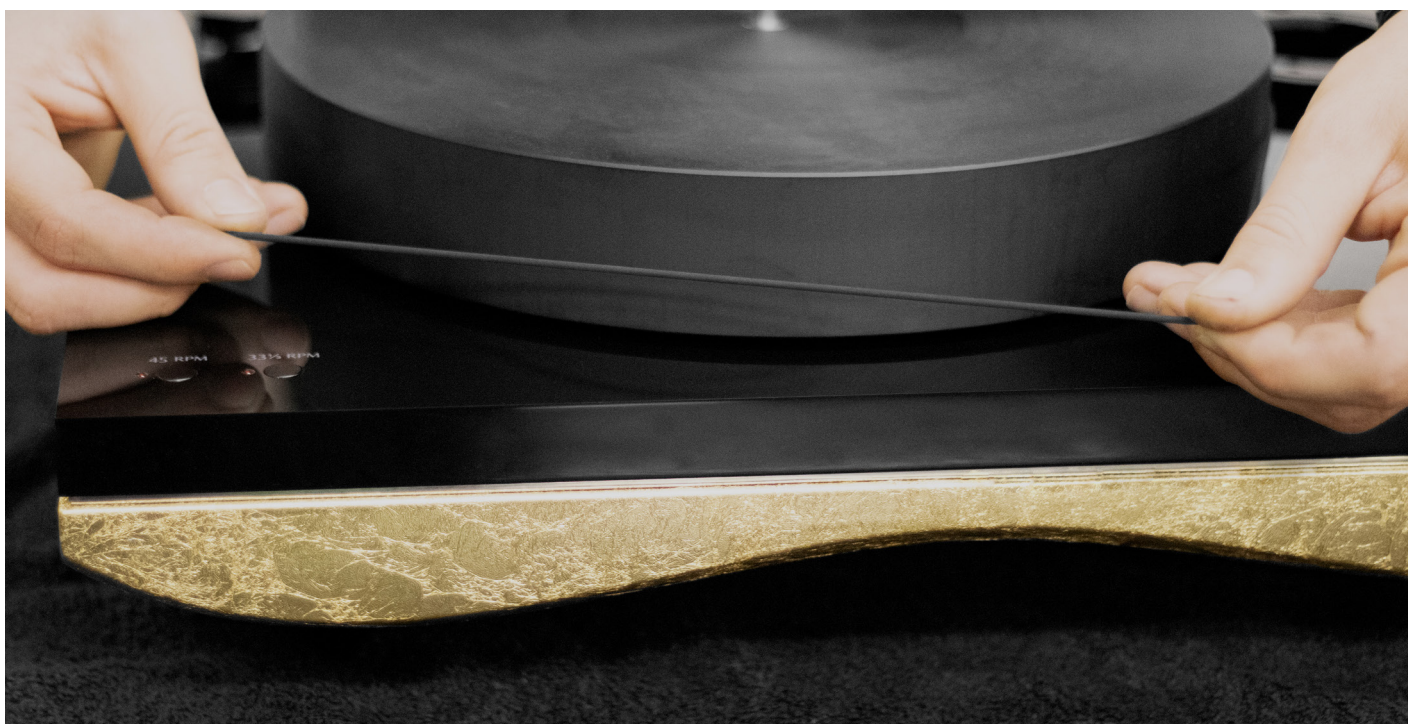

The Gold Note factory is situated among the Chianti hills, surrounded by vineyards and olive trees. A serene and inspiring environment that is our daily source of inspiration. Such special land on one hand allows us to continue learning from its Master craftsmen and on the other gives us the peacefulness to focus on the smallest details when we design highly technical products. And that's how we achieve the perfect sound.

# 100% MADE IN ITALY

Every project begins in the R&D lab where our engineers develop innovative solutions to unlock better audio quality. The perfect chassis comes from the talent of our designer Stefano Bonifazi, who every time demonstrates his unique ability to combine materials and shapes that enhance the performance, merging extreme rigidity, optimal cooling and timeless beauty.

Every component of our devices is designed in-house with the latest generation CAD software, including the chassis which undergoes virtual computerised testing.

The prototype is then stress tested to ensure the maximum resistance and the highest tolerance. Lastly, we move into the most important stage: the listening tests. Testing our equipment in a large variety of environments and conditions, ensure it delivers our unmatched "Italian Sound".

# SYSTEMS THINKING DESIGN

Our philosophy is best represented by the concept of systems thinking, a holistic approach that focuses on the sum of the parts rather than the individual constituents. Such philosophy can be applied to designing single products, as well as the entire audio chain, as the final performance is a product of all stages involved, and this is especially true in High-End.

Whether it comes from a digital or analogue source, our sound is unique: vivid realism, precise imaging, accurate separation of instruments, speed, clarity of detail - these are the qualities we focus on. Musicality comes from balance, a sound that's neither wholly analytical nor emotional.

## TURNTABLES

# MEDITERRANEO

Turntable

Inspired by our Italian heritage, the Mediterraneo turntable combines beauty and technical perfection into a unique instrument for musical pleasure. It is our own ode to musical passion and dedication to vinyl. Made of aged Italian walnut hardwood, the chassis benefits from the quality of such noble material: exceptional elasticity, strength and high density.

HiFi Choice:

*It's excellent built, elegant looks and sumptuous sound quality offer an appealing proposition, while the fact that there are options for getting more out of it with optional extras further down the line makes it all the more appealing.*

# GIGLIO

## Turntable

We believe that every turntable we make has something special that reveals our dedication to traditions, history, and our enthusiasm. Giglio is one of our best creations: our engineers and designers have worked together to achieve the perfect balance between beauty and performance.

Alan Sircom:

*It is an elegant design with a similarly elegant sound, and it has seductive looks. Add to that the simplicity of set-up and this is a turntable that should get lots of attention. It's easy to use, easy to live with, and easy to love.*

# VALORE 425 PLUS

Turntable

The Valore 425 Plus is the most complete and musically satisfying turntable of its category, offering unbeatable audio performance and a great musical pleasure. An elegant and modern turntable, handmade in Italy with the finest quality materials. Its name means both "worth" and "value" in Italian and that is exactly what it is: a fantastic turntable that offers all you need to fully enjoy every LP.

Micro Elliptical

**Cantilever**  
Aluminium

**Body**  
Duralumin 7000 alloy

Matej Isak:  
*Red and Gold are matured, refined products and share enticing qualities of MC's, great balance across the spectrum in absence of artificial bass bump and with airy, natural transparency. They're representing Gold Note's focus on the music.*

Tone Audio:  
*The Machiavelli offers a perfect balance and always serves the music. It is dynamic enough to engage, resolving enough to reveal, yet ever so slightly forgiving, so that nearly all of your records sound great. A perfect host for your music collection.*

# DONATELLO

MC cartridge

Donatello MC is the best sounding cartridge of its category, thanks to solid machined duralumin body light enough to be handled by any tonearm. With its sophisticated computer modeling design, the body weighs only 7 grams. The cartridge is perfectly dampened to help the cantilever achieving the best tracking capability.

# VASARI

MM cartridge

The innovative design of Vasari cartridges, achieved through computer modelling, has been developed to reach the peak performance of the MM cartridges. Its high-dampening structure, made of superior materials, and its ultra-rigid aluminium naked cantilever make the Vasari a superb tracker allowing the diamond stylus to extract all the information from the vinyl groove.

## PHONO STAGES

# PH-1000

Phono stage

- ★ Gain, Load and Capacitance fine adjustments
- ★ Mono/Stereo and Phase inversion
- ★ Integrated class A preamp stage
- ★ Headphone amp with sensitivity selection
- ★ 2 RCA and 1 XLR inputs
- ★ Display for ease of use
- ★ +40 EQ curves
- ★ High-quality analogue components

The PH-1000 is simply the best phono stage we have ever created: a unique piece of audio engineering designed to be innovative in every possible way and 100% made in Italy. For the first time ever, you will be able to play virtually any record the way it's meant to be thanks to more than 40 EQ curves available, or even customise the EQ curves manually. That's why the PH-1000 is a complete game-changer, opening a new era in vinyl reproduction.

- Black
- Gold
- Silver

## OVERVIEW

**Equalisation curve control**  
18 EQ curves all with Enhanced option + 4 custom EQ curves

**For all cartridges**  
MM and MC compatibility

**Capacitance**  
7 options

**Gain**  
14 levels from 31dB to 74dB

**Load**  
12 options RCA, 8 options XRL

**Audio outputs**  
Unbalanced RCA (100Ω); Balanced XLR (300Ω)

## UPGRADES

**PSU-1250/1000**  
External inductive power supplies dedicated to the 1000 series

**Power supply**  
100-120V / 220-240V with auto sense, 50/60Hz

**Power consumption**  
100W

**Dynamic power**  
> 300W with PSU-1250  
> 200W with PSU-1000

Jason Kennedy:  
*The sound it produces is very even handed and refined, the quality of electronics is clearly in the premium league, and this combined with the ability to change so many parameters on the fly makes it a fabulous piece of kit for vinyl lovers looking to get the best out of their collections.*

# PH-10

Phono stage

★ Gain and Load fine adjustments

★ 2 independent RCA inputs

★ High-quality analogue components

★ Display for ease of use

★ 6 EQ curves

The PH-10 is an ultra-versatile phono stage that offers unique features, including EQ curves, load and gain adjustments: a fully analogue design, engineered exclusively with the best components to recreate the musical event in the most natural way possible. The user friendly Single Knob Control (SKG), combined with the color display, allows quick adjustments of any function in real-time during music playback.

- Black
- Gold
- Silver

## OVERVIEW

### Equalisation curve control

3 EQ curves (RIAA, Decca London, American Columbia) all with Enhanced option

### For all cartridges

MM and MC compatibility

### Input impedance

9 options

### Gain

8 levels from 42dB to 71dB

### Audio outputs

Stereo unbalanced RCA and balanced XLR

## UPGRADES

### PSU-10

External inductive power supply dedicated to PH-10

### Power supply

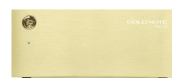

100-120V / 220-240V with auto sense, 50/60Hz

### Power consumption

25W

### Dynamic power

> 50W

Nicholas Ripley:  
*I expected something of an extreme, either soft-sounding or very harsh and hard-edged. In fact, I got neither of these things. What I got instead was a fast, accurate, and very detailed phono stage that is whisper quiet.*

# ELECTRONICS

# CD-1000

CD-Player

★ Massive chassis in aluminium

★ Digital inputs and outputs

★ Low-jitter clock

★ Optional external tube output stage

★ Ultra-rigid mechanism in aluminium

★ Optional external power supply

A state-of-the-art CD-player which integrates both a digital and an analogue stage in an elegant unit. The CD-1000 is housed in a beautiful brushed aluminium chassis and made of high-quality components, providing great audio performances and versatile functions. It recreates a natural and detailed sound, with surprisingly "analogue" qualities.

# IS-1000

## Integrated amplifier

★ MM/MC Phono stage

★ High-End DAC

★ Digital and analogue inputs

★ Class AB amplifier

★ Supports Tidal, Qobuz, Spotify, MQA

★ Plug&Play and easy to use

★ Roon Ready, Airplay

The super integrated IS-1000 redefines the concept of High-End audio and how the music is experienced. The first truly All-In-One product designed to offer advanced features, it leverages the best audio technology to deliver a true audiophile experience.

### OVERVIEW

**Integrated amplifier**  
Class AB Mosfet (125W @ 8Ω)

**High resolution streaming**  
Tidal, Qobuz, Deezer, Spotify, Airplay, Roon Ready, MQA and vTuner

**App**  
GN Control App for iOS and Android

Neil Gader:  
*In today's high-end amplifier market, it isn't enough just to sound good anymore. In my view Gold Note has fulfilled the expectations of enthusiasts by producing a musically engaging and highly configurable integrated. At every level of execution the Gold Note IS-1000 truly strikes the right note.*

# DS-1000 EVO **NEW**

Streaming DAC

The DS-1000 EVO is our new generation streaming DAC designed to push the boundaries of digital audio to new heights. Featuring a Dual/Mono architecture with two D/A chipsets, it uses one DAC per channel to achieve the best audio quality possible - while the class A output stage guarantees a high level of musicality and realism in sound reproduction. The latest technology in digital audio also allows for extremely high resolution, up to DSD512 and PCM 32bit/384kHz, to enjoy the finest details in every track. With the integrated class A Line Preamp, headphone output and analogue inputs, the DS-1000 EVO is extremely flexible and represents the definitive digital audio source for a High-End system. It fully supports Tidal (& Tidal Connect), Qobuz, Spotify Connect, vTuner, and UPnP/DLNA media servers. The DS-1000 EVO is also Roon Ready and offers Airplay and Bluetooth 5.0 for extended connectivity.

## UPGRADES

# P-1000

## Preamplifier

★ Class A design

★ 8 analogue inputs

★ High-quality analogue components

★ Display for ease of use

★ Mono/Stereo with Phase inversion

★ 6 gain stages

Designed for High-End audio systems, the P-1000 is our class A line preamplifier powered by the new proprietary Six Gain Stage Ultra-Balanced design, featuring relays and optical ALPS Encoder volume control.

The P-1000 belongs to a new era of electronics. Top performances and advanced technology combined to offer an outstanding musical experience, with incredibly low distortion and extended linear bandwidth.

# PA-1175

Power amplifier

★ BTL technology

★ 4 pairs of power transistors

★ Stereo/Mono

★ Class AB design

★ Damping factor selection

Class AB power amplifier with a selectable damping factor for easy matching with a wide variety of loudspeakers.

PA-1175 features proprietary optical BIAS to deliver high power with ultra-low distortion, as well as optical decoupling to overcome the downgrading solutions of traditional electronics, assuring the highest level of electrical protection and unbeatable performance. Thanks to its BTL technology, it's easy to use in stereo and mono mode.

## OVERVIEW

### Power output

200W @ 8Ω per channel (520W @ 8Ω in mono BTL)

### Frequency response

1Hz-100kHz @ ± 1dB

### Signal to noise ratio

110dB

### Damping factor

High (250) or low (25)

### Slew rate

20V/μs

### Input sensitivity

1V RCA and 4V XLR

### Input impedance

47kΩ

### Power consumption

1200W max – 1,2 W idle

### Power transformers

624VA

● Black

● Gold

● Silver

Srajan Ebaen:

*For hifi hardware, I'd now have this company's first new stereo amp in two decades. It's called PA-1175 where 'PA' is short for power amp, not public address system. For the complete experience, one would obviously want an entire Gold Note system. It's something this company actually do offer.*

# PA-10

Power amplifier

★ Stereo/Mono

★ Adjustable Damping Factor

★ BTL technology

★ Up to 600W per channel

The PA-10 is a high-power amplifier characterised by the compact size and versatility, suitable for any modern High-End audio system. Carefully built with aluminum chassis and accurately selected audio components, the PA-10 is small but capable of astounding power and able to drive any kind of loudspeakers. Thanks to its BTL technology, it's easy to use in stereo and mono mode.

## OVERVIEW

### Power output

75W @ 8Ω and 150W @ 4Ω per channel, 600W @ 4Ω per channel in mono (BTL)

### Frequency response

10Hz-30kHz @ ± 1dB

### Damping factor

High (250) or low (25)

### Input sensitivity

1,4V RMS on RCA and XLR

### Input impedance

13kΩ RCA/XLR

### Power consumption

150W @ 1/4 of nominal power, 1400W max

● Black

● Gold

● Silver

Matej Isak:

*Like a Ferrari, the PA-10s corner well with speed, precision, and accuracy—as well as style and panache. I would highly recommend them.*

# TUBE-1012

Valve output stage

★ 12 vacuum tubes

★ Compatible with other vacuum tubes

★ Can be connected to electronics of other brands

TUBE-1012 is the best way to further enhance the Gold Note electronics, that will reach a whole new level of performance through the class A 12 valve output stage.

Our TUBE-1012 is capable of great control and definition, providing outstanding realism in recreating the musical event and a natural, warmer listening experience.

## OVERVIEW

### Max input

12 Vrms on XLR, 6 Vrms on RCA

### Max output

16 Vrms on XLR, 8 Vrms on RCA

### Output impedance

< 600Ω

### Recommended load

> 10kΩ

### Tubes

6n1p x 12

### Gain

2dB

### Inputs tube

1x XLR Line In

1x RCA Line In

1x Tube In (5-pole XLR for Gold Note sources only)

### Power Consumption

80W

### Power Supply

100-120V or 220-240V, 50/60Hz

Super Linear Vacuum Tube Regulator with 4 Inductive Choke filters

# LOUDSPEAKERS

# XS-85

## Loudspeakers

★ 3-way, full-range speaker

★ Multi-port bass reflex

★ Superior crossover circuitry design

★ High-quality components

The XS-85 is our masterpiece: a full-range, 3-way floor standing loudspeaker with rear double bass reflex design entirely shaped according to the iconic Gold Note design. It delivers state-of-the-art performances, guaranteed by high-quality components combined with elegant cabinets. Extremely versatile, the XS-85 is capable of reproducing the most challenging musical passages impressively and realistically, with crystal clear details.

Andrej Turok:  
*As a musician, I especially appreciate a high level of musicality of the performance with a certain dose of "playfulness". Plus the breathtaking Bella Figura!*

# XT-7

## Loudspeakers

★ 3-way, full-range speaker

★ Multi-port bass reflex

★ Ribbon tweeter

★ High-quality components

The XT-7 is a full range, 3-way floor-standing speaker featuring an aluminium rear bass reflex and curved shape side panels. Its unique design is based on a reinforced cabinet made of wooden “sculptured” multilayer panels, to achieve exceptional control over unwanted resonances.

Manufactured by the best Italian wood-makers, this loudspeaker suitcases all its original beauty and its innovative technology, allowing ultra-low distortion and natural, well-balanced, smooth musical reproduction.

#### Suggested power amplifier

min. 30W

#### Max power handling

200W RMS

#### Nominal impedance

4Ω semi-resistive

HI-FI CHOICE

Srajan Ebaen:

*Based on this model, the company would be a success even if they made nothing but speakers. This is far from the norm for do-everything firms. It must be acknowledged upfront to bury any suspicions to the contrary. Now the slogan's 'renaissance' acquires new meaning.*

# A6 EVO II

Loudspeakers

★ 3-way, full-range speaker

★ Multi-port bass reflex

★ Premium materials and luxurious finishes

★ Completely made in Italy

Featuring a totally new look on the front panel, the A6 EVO II, with its distinctive diamond-shaped body, is designed to control vibrations the best.

The combination of its unique shape and the cabinet creates an ultra-rigid structure that enhances power control and provides a greater dynamic response, maintaining ultra-clean and powerful high frequencies.

HI-FI MUSIC GEAR

Srajan Ebaen:  
*It's lovely when a concept is so clear about what it wants, then so clear about giving us just that, exactly. Being rather handsome to boot then comes as a bonus.*

# A3 EVO II

Loudspeakers

★ Premium materials and luxurious finishes

★ 2-way bookshelf speaker with bass reflex

★ Completely made in Italy

This elegant 2-way bass reflex bookshelf loudspeaker sweeps audiophiles off their feet despite its very compact size. The A3 EVO II's stunning diamond-shaped cabinet is exclusively handcrafted in Italy by the best wood-makers to achieve an ultra-rigid structure and the truly best audio quality. Exceptional components, including a silk dome tweeter, ensure an extended frequency response.

## TONE

Jeff Dorgay:  
*This gorgeous little pair of speakers is like a tuned Fiat Abarth. More sound and fun than you'd ever think could come from that small shape.*
