

Dynavoice Definition DM-6

Bring your music to life!

For a decade DM-6 has gotten excellent reviews in HiFi magazines and by enthusiasts around the world. By only using hand-picked, high-quality components it delivers a powerful, crisp and natural sound that will let you experience your favourite music in a whole new way. With a combined soft dome and ribbon tweeter, an extremely well-built cabinet and the customized Kevlar coated cone the DM-6 personifies the essence of Dynavoice.

Dimensions (HxWxD) mm	420 x 200 x 330
Weight kg (each)	9,1
Finish	Available in Black, Oak, White
Quantity	Sold in pair

The enthusiast's favourite – A quote that sums up the DM-6 perfectly comes from a user review: *“Even the deep bass in the beginning of Tubular World by Mike Oldfield is handled perfectly. I have heard speakers that cost ten times as much fail to play that part.”*

Special coating – The speaker has a bullet proof Kevlar coating that stiffens the cone while keeping the weight as low as possible. This adds stability and makes the speaker more responsive to micro details.

Dual tweeters – By using both a ribbon tweeter and a soft dome tweeter the Definition series reproduces wide and clear details in the higher frequencies.

Dynavoice X-Change – The Bi-wire, gold plated terminal has the Dynavoice X-change function. This lets you control the upper midrange frequencies, a great way to adjust the sound depending on the room and speaker placement.
